

MAKER SPACE

MANUAL

BRISTLE BOTS

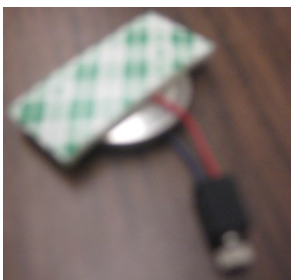

1. You'll need to gather the following tools & Components.

- Pliers with cutters
- Scissors
- Double stick tape
- Masking tape (show)
- Duracell 2023
- Toothbrush
- Vibration Motor

2. Assembly

First Cut off a short amount (~.75") of double stick tape.

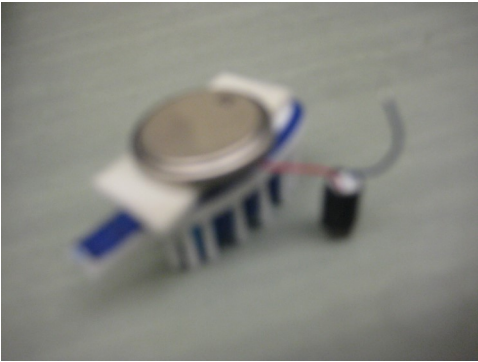

You will also need a similar amount of masking tape.

Using the Double stick tape the red wire from the motor to the + side of the battery.

2. Assembly cont.

Then using the other side of the double stick attach the battery & motor wire to the Bristles of the toothbrush.

Finally using the masking tape attach the black wire from the motor to the other side of the battery

Let the Bot go.

Notes:

The vibration motor can be purchased from various electronics suppliers A quick search of the suppliers I use found this: <https://www.sparkfun.com/products/8449>
